

SAFFRONY INSTITUTE OF TECHNOLOGY S.P.B. PATEL ENGINEERING COLLEGE

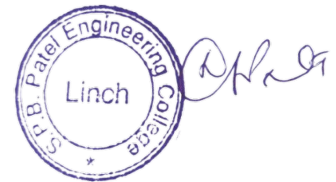

Undertaking

Previously, S.P.B. Patel Engineering College did not adhere to the practice of geotagging photographs of events. Although the Institute has consistently captured images of our events, these photographs have not been geotagged. However, moving forward, the Institute is committed to implementing this practice.

Effective immediately, all event photographs will be geotagged to accurately denote the location where they were captured. This commitment ensures transparency, enhances the documentation process, and provides valuable context to our event imagery.

The Institute acknowledges the importance of embracing modern technologies and practices to continually improve our operations. Geotagging our event photographs is a step towards enhancing the quality and authenticity of our documentation efforts.

Thank you for your cooperation and understanding as we adopt this new practice.
